

# WHEN SHOULD YOU UPGRADE YOUR PLC SYSTEM?

Knowing when to upgrade can prevent downtime, reduce costs, and future-proof your operations.

PLAN AHEAD.  
REDUCE RISK.  
STAY AHEAD.

Outdated PLC systems increase risk, downtime, and maintenance costs.

Upgrading at the right time improves performance, reliability, and long-term value.

## SIGNS IT'S TIME TO UPGRADE

- Your PLC is End-of-Life**  
The manufacturer no longer supports your system.
- Rising Maintenance Costs**  
Frequent repairs and hard-to-find spares are increasing costs.
- Increased Downtime**  
Systems are less reliable and failures are more frequent.
- Limited Performance**  
Your system can't keep up with operational demands.
- Poor Integration**  
Difficult to connect with modern systems and technologies.
- Security Vulnerabilities**  
Legacy systems may expose your operations to risk.

## THE RISKS OF WAITING

- Unexpected Failures**  
Greater risk of sudden breakdowns and production loss.
- Higher Costs**  
Emergency repairs and downtime cost more than planned upgrades.
- Lost Productivity**  
Inefficient systems reduce output and increase frustration.
- Compliance Issues**  
Outdated systems may not meet current standards.
- Falling Behind**  
Dilder systems limit innovation and competitiveness.

## THE BENEFITS OF UPGRADING

- Improved Reliability**  
More dependable systems reduce unplanned downtime.
- Lower Maintenance Costs**  
Modern systems are easier to support and maintain.
- Better Performance**  
Faster processing and improved operational efficiency.
- Future Ready**  
Scalable solutions to support growth and new technologies.
- Enhanced Security**  
Stronger protection for your systems and data.
- Long-Term Value**  
Maximise ROI and reduce total cost of ownership.

## THE RESULTS

**LESS DOWNTIME**  
More reliable systems mean more uptime.

**LOWER COSTS**  
Reduce repairs, downtime, and maintenance spend.

**HIGHER PERFORMANCE**  
Optimised systems deliver better output and efficiency.

**REDUCED RISK**  
Minimise failures, security threats, and compliance risk.

**FUTURE READY**  
Systems built to adapt and grow with your business.

**UPGRADE TODAY. PERFORM TOMORROW.**
